"Recent climate events highlight the urgency of transitioning to clean energy solutions. Solar power paired with battery storage is a vital strategy to support reliability for the ...

CAISO BESS: A Battery Energy Storage System (BESS) managed by the California Independent System Operator (CAISO). It stores and releases electricity to help balance supply and ...

The state is expected to need about 50 gigawatts of battery storage to meet its 2045 goal of getting all of its power from carbon-free sources, up from about 7 GW today.

Much of that is new battery energy storage, which captures and stores electricity for later use. In fact, batteries have been transformative for California, state officials say.

The energy storage industry walked a bumpy road in 2025, but eyes are turning toward 2026's tech stack. While lithium-ion remains dominant, pressure is building for longer ...

Much of that is new battery energy storage, which captures and stores electricity for later use. In fact, batteries have been ...

One of the US's largest solar + battery storage projects is now fully online in Mojave, California.

Battery storage provides a critical and cost-effective source of clean and reliable power that can be stored and used at night or during periods of high demand, which helps reduce California's ...

Since then, LADWP has worked to deliver the Eland project as one of the lowest cost solar and battery storage projects ever built that will deliver low-cost renewable energy to ...

A storage battery
