Why should you choose a solar company in Ottawa?

Most solar companies are about the sales. We're about lasting systems -- and bringing the future of Ottawa solar power to your home and business. From Cumberland to Carleton Place, we're not a call center with a crew. Our local roots run as deep as our experience -- and we couldn't be prouder to have installed our neighbours' solar panels since 2009.

Does Ottawa have a battery energy storage plan?

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage uses in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high demand.

Are solar and battery storage a distributed energy resource?

Solar and battery storage are considered a Distributed Energy Resource, or DER. This refers to small-scale power generation and storage systems that are 'distributed', meaning they are spread out closer to where the energy is needed, rather than relying on one large power source.

Is there a Bess project in West Ottawa?

Yes, there are two transmission scale BESS projects proposed in rural west Ottawa. One in West Carleton-March (Ward 5) and the other is in Rideau-Jock (Ward 21). Are there land use impacts associated with BESS?

Our customized solar battery storage solutions provide greater energy independence, improved sustainability, and long-term savings, making it easier than ever to maximize the value of your ...
