Hydro, wind, and solar energy can benefit significantly from synergies with underground energy storage technologies. For instance, ...

Local leaders and clean energy experts gathered Tuesday beneath a blazing desert sun to mark the initiation of full production from 1.36 million solar panels and 172 lithium iron ...

DCEP will be developed on 9,500 acres of retired agricultural land in western Fresno County by IP Darden I, LLC, a subsidiary of Intersect Power. The project will feature a ...

Helms" true superpower is its ability to move millions of gallons of water between its two interconnected reservoirs, acting as a massive renewable battery available to come ...

One of the US"s largest solar + battery storage projects is now fully online in Mojave, California.

California already has the most utility-scale battery storage systems nationwide but it is about to set a new record.

Local leaders and clean energy experts gathered Tuesday beneath a blazing desert sun to mark the initiation of full production from ...

The relatively cool, compressed air is then pumped into an underground salt cavern for storage. During peak energy demand hours, the stored air is ...

Hydro, wind, and solar energy can benefit significantly from synergies with underground energy storage technologies. For instance, pumped hydro systems can act as ...

San Francisco-based Intersect Power specializes in solar-plus-storage installation. The company said it has a current portfolio of ...

Researchers in the Stanford School of Sustainability have patented a sustainable, cost-effective, scalable subsurface energy storage system ...

San Francisco-based Intersect Power specializes in solar-plus-storage installation. The company said it has a current portfolio of 2.2 of operating solar power, and 2.4 kWh of ...

By pairing utility-scale solar with advanced energy storage technology, Eland delivers low-cost electricity to meet LA's growing energy needs -- including when demand ...

Researchers in the Stanford School of Sustainability have patented a sustainable, cost-effective, scalable subsurface energy storage system with the potential to revolutionize solar thermal ...

The relatively cool, compressed air is then pumped into an underground salt cavern for storage. During peak energy demand hours, the stored air is released into a piping system and mixed ...

Helms' true superpower is its ability to move millions of gallons of water between its two interconnected reservoirs, acting as a ...
