-----  
Which US-built offshore wind substation is complete?

The first US-built offshore wind substation is complete and headed to South Fork Wind- a major milestone for the US offshore wind industry. Offshore substations collect and stabilize power that the wind turbines generate,preparing it for transmission to shore.

How many homes will offshore wind power?

Our portfolio of offshore wind farms will produce enough clean energy to power nearly 1.5 million American homes. We're operating and developing nearly 2.8 GW of offshore wind capacity along the East Coast. As a global leader in offshore wind,we have over 30 years of experience in building and operating offshore wind power.

What is New York's first offshore wind farm?

South Fork Wind is New York's first offshore wind farm,generating enough renewable energy to power approximately 70,000 Long Island homes. Sunrise Wind will be located more than 30 miles east of Montauk Point. The project will generate approximately 924 megawatts of offshore wind energy,which is enough to power nearly 600,000 homes.

What is an offshore substation?

Offshore substations collect and stabilize power that the wind turbines generate,preparing it for transmission to shore. South Fork Wind's 1,500-ton,60-foot-tall substation was designed and engineered in Kansas,and built near Corpus Christi by Kiewit Offshore Services,the largest offshore fabricator in the US.
